SUMMARY

A motivated Software Engineering graduate from CINEC Campus with a strong foundation in full-stack web and mobile development. Proficient in React, Node.js, PHP, and Flutter, with hands-on experience building real-world applications such as employee management systems and health and wellness applications. Possesses technical skills and a passion for UI/UX to contribute to innovative software solutions in a collaborative team environment.

PROJECTS

Sky Plains

HTML, CSS, JS

This website is dedicated to showcasing the natural beauty and environment of Horton Plains and it allows users to upload their natural beauty photos and plan their trips.

Hyperlocal Weather App (Group Project)

React, HTML, XML, CSS, JS, JSON, Firebase

It is a community-centric weather platform that provides real-time local weather updates and severe weather alerts, allowing the community to view these alerts on a live map. (Group Project)

Health & Wellness App

Flutter, Dart, Android

A modern mobile application designed to help users track their health metrics and receive personal wellness guidance.
