Summary

A motivated Software Engineering graduate from CINEC Campus with a strong foundation in full-stack web and mobile development. Proficient in React, Node.js, PHP, and Flutter, with hands-on experience building real-world applications such as employee management systems and health and wellness applications. Possesses technical skills and a passion for UI/UX to contribute to innovative software solutions in a collaborative team environment.

Education

Bachelor of Science (Honours) in Software Engineering, *CINEC Campus* 2024 – 2028
Malabe, Sri Lanka

G.C.E. Advanced Level, *Ananda Sasthralaya Kotte* 2022(23)
Stream: Technology

Technical Skills

Frontend
HTML5, CSS3, JavaScript, React

Backend
PHP, Node.js, Python, Java, C

Mobile
Flutter, Android

Database & Servers
MySQL, MongoDB, Firebase, SQL Server, Nginx

Tools & Platforms
GitHub, VS Code, InfinityFree, PythonAnywhere

Projects

FloodGuardLK – IoT-Based Flood Early Warning System (Group Project)
Technologies: IoT, Raspberry Pi, Azure IoT Hub, LoRaWAN, MQTT, Android, GPS

A proposed IoT-driven flood early warning system designed to monitor river water levels and rainfall conditions in Sri Lanka is being developed. The system integrates multiple sensors, edge computing, and cloud technology to identify potential flood risks and provide real-time, location-based alerts. It aims to provide multilingual warnings and evacuation instructions through a mobile application, while providing a centralized dashboard for Disaster Management Center (DMC) officials to monitor sensor data and coordinate emergency responses.

Hyperlocal Weather App (Group Project)
React, HTML, XML, CSS, JS, JSON, Firebase

Developed a responsive community-based weather application that enables users to monitor hyperlocal weather conditions, receive localized weather alerts, explore affected areas through an interactive map, and submit community impact reports. The application helps users stay informed about local weather events and their potential impacts.

Trendy Clothes App
Flutter, Dart, Android,Firebase

Developed "Trendy Clothes", a cross-platform mobile e-commerce application using Flutter and Firebase Cloud Firestore, featuring a dual-role architecture for Customers and Administrators. The app enables users to browse apparel across multiple categories, customize sizes and colors, manage a dynamic shopping cart, and place orders with instant checkout. It also includes an administrative dashboard for real-time inventory management, sales analytics, and order status tracking.

Professional Skills

- Leadership
- Decision Making
- Problem Solving
- Team Building
- Communication

Languages

- Sinhala
- English

Extra-Curricular Activities

IEEE Student Member, IEEE Global Community 2026 – Present
Official IEEE Student Member with certified membership reflecting a personal and professional commitment to the advancement of technology.

Active Member, Marketing Team, IEEE Student Branch, CINEC Campus
Promote branch events and campaigns, including the IEEE Xtreme 20.0 and Road to Xtreme 2.0 program, to increase student engagement and participation.

Contribute to social media outreach and content for the official launch of Road to Xtreme 2.0 helping to promote sessions and resources for the global coding competition.

Member & Performer – School Western Band, *Ananda Sasthralaya Kotte*
Represented the school and secured 3rd Place at the All-Island Inter-School Western Band Competition organized by the Ministry of Education. Played flute and actively participated in island-wide performances and parades.
